Style of gobos available

Steel Gobo

The Most common gobo type . Fastest Turnaround time
Lowest price. Metal gobos require "Tabbing" which connect the lines necessary to maintain the overall appearance and integrity of the image.

Glass Gobo

Highest quality with Multiple color options. Most versatile for smaller gobo sizes. Glass gobos project clear, crisp detailed photos, images, or logos that require specific color matches or gray scale without "Tabbing".

Cool ink HD

Designed specifically for LED fixtures

Cool Ink HD gobos add a proprietary masking process to the printed plastic gobo and sandwich them between two layers of heat deflecting glass. This process improves the plastic gobo's ability to resist heat and image distortion due to warping caused by heat - plus the glass allows users to clean fingerprints and other smudges off of their projection.

The Cool Ink HD imaging process offers a higher resolution for short term applications, particularly for color or grey scale images, and is especially recommended for artwork that has a
